COUNTY RANGERS TO BEGIN WORK AT BISBEE ON DEC. 1

Bisbee, Ariz., Nov. 28.—The county rangers, recently appointed, will begin service next Thursday, December 1. They will patrol the Sulphur Springs and the San Pedro districts and the territory extending to the border of Santa Cruz county.

Norman Jones, 22 years old, who came here from Kentucky on account of ill health, died of tuberculosis.

Dr. Goodfry, territorial health officer, states that from statistics he has ascertained that there is more typhoid fever in this district than in any other district in the southwest. He blames the people, who are not very careful about hygienic matters. Dr. Goodfry stated also that during the last few months many deaths among children under 10 years of age occurred in the territory, the mortality reaching a high figure among Mexicans.

A committee has been appointed by United States attorney Morrison to carry out the suggestions which Dr. McCormack gave to the citizens of Bisbee concerning public health. In his recent lecture. The committee is composed as follows: Dr. Robert Ferguson, Mrs. W. E. Hankins, Mrs. Fred Juliff, H. Poppen, Judge J. M. O'Connell, J. Bauerfeld, Rev. J. E. Fry and Prof. C. F. Philbrook.

H. G. Garcia notified the police that his house had been broken into and \$270 in cash taken.

D. Twomey and Miss Mary Goder celebrated Thanksgiving by being united in marriage by Rev. Meurer at St. Patrick's church.

Owing to a change in the train schedule, the general railway windows at the postoffice will be opened on Sundays and holidays one hour later than usual.

OFFICIALS GO TO BISBEE

A. N. Brown, general traffic manager, and Eugene Fox, general freight and passenger agent, both of the E. P. & S. W., have gone to Bisbee in the private car Alamogordo.

Tom Lea, judge of police court, is in Alamogordo.

Who Are "They?"

We all have a way of saying "they say" this or that or some person, or some thing and accepting it ourselves as authentic when someone says "they say" to us.

But if we stopped to inquire into the exact source of the information, either we would be amazed to trace it back to anyone other than that elusive individual, "They Say," or we will find back of it the unkind gossip of some enemy.

And just because "they say" fails to put the blame of a falsehood on any one person's shoulders it really is the most dangerous of statements and one of the hardest to refute.

So let us beware of believing "they say" stories. Let us treat lightly all gossip introduced by the words "they say." Or if this gossip makes us suspicious of its object—and it is natural and human that it should at times—let us suspend judgment until we KNOW. In other words, let us do the object of "they say" the justice to investigate until we find someone who is in a position from actual knowledge and whom we can trust, to make a positive statement over his own name as to the truth or falsity of the "they say" story.

The writer has been led to pen this little lesson in practical fairness by reading a little book issued by the Coca-Cola Company, of Atlanta, Ga., entitled "The Truth About Coca-Cola." That truly delicious and wholesome beverage has for so long been the subject of "they say" stories in which all manner of untrue and detrimental things about Coca-Cola have been circulated that the manufacturers have been forced to issue their book giving authentic information about this beverage. And the information therein contained does not rest its case on any "they say" statements, but bases its arguments on analyses and statements of chemists and scientists occupying the highest positions in America.

This is a most interesting book—a fine study in dignity in refuting falsehoods—and a book of information that all should read. You will find it well worth your while to write and ask the Coca-Cola Company, Atlanta, Ga., to send you a free copy.
